

2nd Edition

Battery Asset Management SUMMIT EUROPE

Host Sponsor

2-3 December 2025
Rome, Italy

**Connecting Asset Operators & Optimisers
in Europe's Buildout of Energy Storage**

Delegate Guidebook

Welcome to the Battery Asset Management Summit Europe 2025

The first Battery Asset Management Summit Europe, held in 2024, marked a major step forward for the continent's fast-growing energy storage market. With 214 delegates, 16 countries represented, and 18 sponsors, the event established a much-needed platform for Europe's battery operations community.

Now returning on 2–3 December 2025 at the NH Collection Vittorio Veneto in Rome, the Summit comes as Europe targets 200GW of storage by 2030. With landmark initiatives such as Italy's MACSE programme and strong policy momentum across the region, battery asset management is now central to long-term success.

This year's programme will explore how asset owners, operators, and investors can maximise performance and profitability across the lifecycle—from commissioning to optimisation and end-of-life. Key themes include Revenue & Trading, Lifecycle Management, and Optimisation & Innovation, with dedicated sessions on leading markets such as Italy, Germany, the UK & Ireland, Iberia, the Nordics, and Benelux.

Delegates can expect market deep dives, networking roundtables, and Ask-Me-Anything sessions, connecting with asset owners, optimisers, software innovators, O&M providers, and technical consultancies, all focused on unlocking the next phase of Europe's energy storage growth.

Looking forward to seeing you there!
