**Building Critical Partnerships to Accelerate
Solar Deployment in Central & Eastern Europe**

Post Show Report

Over two days, Large Scale Solar Central & Eastern Europe brought together leading investors, developers, financiers, and technology providers in Warsaw to map the next chapter of solar and storage deployment across the region. The discussions took place against the backdrop of one of Europe's fastest-growing markets, with CEE solar capacity expanding at record pace and utility-scale storage positioned as a critical enabler of future grid stability.

This year's agenda reflected the complexity and momentum of the sector. We examined how bankability is shifting amid rising curtailment and volatile offtake markets, explored the accelerating push toward co-located PV + BESS projects, and delved into the regulatory and grid-readiness reforms needed to unlock new capacity. Navigating rapid growth, uneven policy frameworks, and evolving market structures remains a central challenge for stakeholders, but the surge of capital, innovation, and policy ambition across CEE is opening new possibilities for the industry.

Above all, the conference underscored the pivotal role of large-scale solar and storage in delivering CEE's energy transition. We thank our speakers, sponsors, partners, and attendees for their invaluable contributions and look forward to welcoming you again next year.

Best regards,

Alice Fitzsimons

What Our Attendees Thought

“

A well organised gathering of developers, hardware manufacturers, investors and advisors from across the region, which yields frank and insightful discussions on policy and opportunities in Central and Eastern Europe.

Starlight Energy

“

A good networking event, having become more geographically focused also in terms of participants.

PV-Invest GmbH

“

Well attended and good contacts to be made.

Solarport System

Our Speakers Included

The 2025 Summit welcomed speakers from across the Central Eastern European region to share their experience and expertise with attendees.

Delegate Breakdown

Company Activity

This Summit is designed for and consistently has C-Level, Senior Management, Project Managers, Consultants and key industry stakeholders from across the entire Energy Storage eco-system.

Government & Regulatory Bodies

Utilities

IPPs & EPC's

TSO's & DSO's

Developers & IPP's

Energy Buyers

Technology & Software Companies

Manufacturers

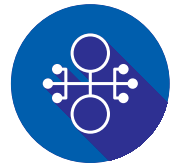

Financiers, Investors & Banks

Legal Services

Start-Ups

Consultants

Companies That Attended Include:

Large Scale Solar Central Eastern Europe is evolving into SolarPLUS Central Eastern Europe

SolarPlus
by informa...

Central Eastern Europe

From 2026, the Summit becomes SolarPLUS CEE, a rebrand that mirrors where the market is heading. Developers, investors and utilities are now managing hybrid assets, multi-state pipelines, storage co-location and complex grid challenges.

SolarPLUS CEE brings all of these conversations together in one place, giving you a clearer view of how to scale firm, reliable clean power across the region.

SOLAR PLUS SERIES

OUR SUMMIT SERIES

Each Summit provides targeted access to high-level audiences, thought leadership opportunities, and the chance to build meaningful partnerships in growing storage markets.

UK Solar Summit

Europe Companies

LinkedIn Twitter Reddit Facebook

'Poland is at a turning point in its energy transition,' said Dominik Radziwill, non-executive chairman of GreenYellow. Image: Unsplash.

French renewables firm GreenYellow plans to invest €100 million (US\$116 million) in Poland over the next three years to expand its installed capacity and customer base.

The firm said Poland is at a pivotal stage in its energy transition and that its investment is aimed at helping businesses access clean energy through integrated solutions. Ewa Klimont, general manager of GreenYellow Polska, added that GreenYellow seeks to position itself as the "preferred energy partner" for Polish commercial and industrial (C&I) clients.
